Joyful Leadership – context, concept

In the modern world, organisations need **leaders** and a **developed leadership culture** according to their mission and the needs of all members. **A leader motivates and inspires people and builds a team** that it is efficient at achieving a common vision. When organisations can't achieve their mission and vision, they remain without a fundamental function - they can't contribute to the development of the community and won't have a long-term impact on society. This is particularly important in the case of youth workers in NGOs because they need strong motivation and continuous support to carry on with their work efficiently.

In response to the need for quality leadership education, Oaza's international team of experts developed the concept of **Joyful Leadership**. They poured the decades of experience and knowledge into creating this holistic concept, wanting to empower new generations of role-model leaders.

5 LEVELS OF HOLISTIC APPROACH:

5. FRUITS
- **Producing Results**

4. LEAVES
- **Facing Challenges**

3. BRANCHES
- **Working Together**

2. TRUNK
- **Becoming Strong**

1. ROOTS
- **Building Foundation**

Joyful Leadership is defined as the process of joyfully influencing others in what needs to be done and how to achieve common goals for the benefit of all.
